

## ② “Magnitude” and “Shindo”

**An earthquake is described with only one number of magnitude scale, on the otherhand, “Shindo” differs from place to place.**

created based on The Headquarters for Earthquake Research Promotion's website

“Magnitude” is a scale of earthquake, meaning how big energy it is.

“Shindo” is a Japanese seismic intensity scale, which represents the intensity of shaking of ground surface. So, “Shindo” differs from place to place in one earthquake.
