

① What is “EARTHQUAKE”?

the word “EARTHQUAKE” is used in two ways.

(A) Underground rocks move suddenly

(B) The ground sways

(B) is sometimes called "earthquake motion" to distinguish between the two meanings.

Geo-hakase

(C) “Earthquake disaster” means human damage, is better to be distinguished from A and B, which are natural phenomena.

Kozo-kun

Distinguishing between earthquakes / earthquakes motions (natural phenomena) and earthquakes (social phenomena)
