

☆ Q and A ☆

Q

What are the different ways of shifting the fault?

A

There are four ways to shift depending on how the underground force is applied.

Various ways of fault displacement

created based on The Headquarters for Earthquake Research Promotion's website
source: <https://www.jishin.go.jp/>

When viewed from the front side (Kozo-kun side), the opposite side (Bikkuri-kun's standing side) shifts to the left is left lateral shift, and the right shift is right lateral shift.
