

⑤ Earthquakes in Japan

There are three types of earthquakes that occur in places like Japan where the plate sinks.

Interplate earthquake

Shallow earthquakes in the continental plate

Earthquake in the subducting ocean plate

Earthquakes that occur where the plate sinks

created based on The Headquarters for Earthquake Research Promotion's website
source: <https://www.jishin.go.jp/>

From here on, let's take a closer look at two types of earthquakes,

Interplate earthquake

Shallow earthquakes in the continental plate

which may cause strong shaking in Oshika Village!
